RE: Castleton-On-Hudson Bridge Rehabilitation

Dear Ms. Misiewicz:

The New York State Thruway Authority is submitting the proposed amendment to the 2022-2027 CDTC TIP for consideration by the Planning Committee at its next scheduled meeting.

TIP PROJECT NUMBER: R360 (Thruway Project #B786.1)

The amendment is proposed due to the following:

- ☐ Scope Change
- ☐ Cost Change
- ☐ Schedule Change
- ☒ New Project
- ☐ Other

PROVIDE EXPLANATION FOR CHANGE:

This project will rehabilitate and strengthen deteriorated sections of conditionally at-risk elements of the Castleton-On-Hudson Bridge (BIN# 5006599). The Bridge is on the National Bridge Inventory under 23 U.S.C. 144(b).

This project addresses the NBI “Poor” rated and quickly deteriorating “Fair” rated elements of the eastbound bridge superstructure. Proposed work includes replacement of the eastbound structural deck with a new superstructure slab with integral wearing surface, steel repairs to girders for the approach spans and truss members of the truss spans, installation of a concrete approach slab at each bridge approach, modification to the existing concrete abutment at each approach, and replacement of non-conforming bridge rail with a conforming steel four rail TL-4 system.

The Authority is currently advancing a \$47.6 million project of similar scope, for the westbound area of the superstructure. With completion of these two projects, anticipated service life of the superstructure will be extended by 50 years.
