

Draft Vision Statement for Public Reivew

September 3, 2024

Background

The Capital Region Transportation Council (Transportation Council) has worked with its In Motion Task Force in June and July to prepare a Draft Vision Statement for the new metropolitan transportation plan. On August 7, the Transportation Council Planning Committee recommended the Policy Board act on the following Draft Vision Statement:

By 2050, we will strive to maintain a clean transportation system that provides safe, equitable, resilient, and reliable options for the movement of people and goods. The Capital Region will thrive with a seamless, multimodal network that is community focused, connecting all people to economic opportunity while supporting sustainable growth and livable communities. Transportation investments will address inequities, improve system performance, adapt to technological advancements, and protect the environment for future generations.

Proposed Action and Next Steps

The Transportation Council's staff is seeking Policy Board approval of the Draft Vision Statement and its release to the public for review. The Vision Statement will remain draft as staff and the In Motion Task Force further develop the metropolitan transportation plan through the fall and winter.
